

Deep Vision and Hanseatic Aviation Solutions Sign MOU

Deep Vision of Nova Scotia, Canada and Hanseatic Aviation Solutions of Bremen, Germany have entered into a Memorandum of Understanding. Under this MOU, Deep Vision will become the exclusive supplier of Hanseatic Aviation Solution's fixed-wing UAV's in Canada.

The addition of Deep Vision's advanced autonomous capability will differentiate the Canadian offering. Deep Vision will add value and enhance Hanseatic Aviation Solution's fixed wing UAV's through the integration of its proprietary machine perception technology.

Hanseatic Aviation Solutions recognizes that there is a significant potential to increase the capability, market opportunities, and value of its UAV offerings by incorporating the advanced sensor exploitation technology provided by Deep Vision.

This undertaking leverages the capabilities of Deep Vision and Hanseatic Aviation Solutions to create an advanced autonomous UAV for applications in the civil, defence, security and search and rescue markets.

About Deep Vision

Based in Nova Scotia, Canada, Deep Vision Inc. develops intelligent, real-time, sensor exploitation and machine perception solutions for the Aerospace & Defence industry. We deliver world class capabilities in autonomous systems, robotics, and C4ISTAR. Deep Vision's unique technology enables automated target recognition, tracking, and passive ranging in complex, cluttered environments - independent of sensor motion and at blazing speed.
