

SEA-BIRD
SCIENTIFIC

Sea-Bird Scientific is Hiring!

If you have always wanted to join a global leader in ocean technology, you are in luck. We are currently looking to fill two key roles on our Sales Team – North American Sales Manager and Director of International Channel Sales. Both of these roles are key to our continued growth and success. We are looking for experienced ocean technology professionals with demonstrated abilities to meet objectives, drive results and effectively interact with customers, distributors and co-workers. If this sounds like you, please see the full job descriptions at www.seabird.com/careers. We are looking forward to hearing from you soon!

Sea-Bird Scientific is headquartered in Bellevue WA, with offices in Philomath, OR and Halifax NS. We develop and manufacture sensors for the measurement of salinity, temperature, pressure, dissolved oxygen, fluorescence, nutrients and related oceanographic and environmental water quality parameters. These tools are used around the world by ocean researchers, environmental scientists and marine resource managers. Our customers include research institutes, ocean observing programs, national and local government agencies, engineering firms, environmental consulting businesses, and navies throughout the world.
